Fluid mechanics is the branch of physics concerned with the mechanics of fluids (liquids, gases, and plasmas) and the forces on them. It has applications in a wide range of disciplines, including mechanical, civil, chemical and biomedical engineering, geophysics, astrophysics, and biology.. Fluid Mechanics can also be defined as the science which deals with the study of behaviour of fluids

Fluid Mechanics (FM) publishes papers on fluid mechanics. It is a forum for the publication of high-quality peer-reviewed papers. The journal presents original papers, reviews and letters. The primary goal of this journal is to advance the understanding of fluid model, its application of the principles of physical science by presenting the work in a biophysical context.
