

Engine Release Oil

I did a search and haven't found a reference to this product - "Engine Release" - anyone use this product and what were the results? I have a '69 Chrysler 383 that has sat for almost thirty years (supposedly in a garage). Engine hasn't responded (yet) to a combination of WD-40, PB blaster, MMO w/ a 3/4" and breaker bar.

Seized-Engine Solution: SEIZED OUTBOARD FIXED WITH ENGINE ...

The engine was seized and would not budge. Used Redlead (mixture used to clean gun bores) transmission fluid, Marvel Mystery Oil etc and nothing would work. Bought 3 cans of Engine Release, followed directions and waiting the appropriate time, and darn if the engine turned right over with a hand crank.

Freeing off a stuck,seized engine. Some engines will need their oil pumps primed after standing for a long time,sometimes this can be done by removing a plug and filling the oil ways with oil or the pump is removed and packed with petroleum jelly.The oil filter should be replaced and a new one fitted.

Getting a longtime stored or stuck engine to turn again.

Now There Is A Solution For Engines That Have Seized During Storage. Engine Release fills the gap between the piston and cylinder wall, migrates behind and around each piston ring, then makes its way from the top piston ring and groove to the lowest, through each ring gap. Excess Engine Release wets the piston skirt and cylinder bore making engine...

Hi; a trick I learnt from a person who was faced with the problem of freeing off a seized and VERY rare earo engine was to heat up some old engine oil in a (old, check with wife first!!)saucepan on the cooker and then CAREFULLY pour it down the bores above the piston. It seemed to work as the aircraft is now flying--with its original engine

Old Marine Engine: Seized engine

Each kit consists of an 8-oz. can of Engine Release, a small applicator bottle, and a dispenser hose. The proper application is to put 2 oz. into the small bottle and squirt it into the cylinder through the spark plug or nozzle hole. Then repeat this step every two days until the entire chemical is gone.

Take the glow plug out and put oil in put some in the carb, and the exhaust port, let it set for a day or two, should break loose, you can' use too much. Also this dissolves all the garbage inside the engine, so you can just wash it out with fuel and fire it up, any left over oil will burn out with the fuel.
