We will be using the software package MATLAB, a computer system for doing linear algebra calculations. We will use MATLAB in two ways: 1) to illustrate the basic linear algebra theory we will be developing; 2) to carry out certain important linear algebra calculations that cannot be done by hand (usual pencil-and-paper calculations).

Research engineers will more likely use high level math. Also it depends on the field of engineering. Controls engineers will use linear algebra everyday for research and design. The SpaceX control algorithms for descent involve many different fields of math involving partial differential equations, linear algebra, trig, calculus, etc.
