Note: Maximum interface width varies from device to device depending on the number of I/O pins and DQS or DQ groups available. Achievable interface width also depends on the number of address and command pins that the design requires. To ensure adequate PLL, clock, and device routing resources are available, you should always test fit any IP in the Quartus ® Prime software before PCB sign-off.

Meeting the Needs of All Students. Assessments help teachers and parents know if students are on the path to success. The Smarter Balanced assessment system provides accurate measures of achievement and growth while challenging students to think critically and solve real-world problems. A core principle of the Smarter Balanced system is accessibility for students who take the test.
