Carb kits or carburetor rebuild kits are among the most frequently purchased outboard maintenance parts. New gaskets, o-rings, and fuel inlet needles and seats are often required to return a poorly performing motor to good working order. Some carb kits contain floats and some don't. The main carb jets are not in all kits, either, so it's a good idea to look at a complete engine diagram to see ...

A power pack, or ignition module, is the device that controls the timing of ignition functions on all engine cylinders. Some power packs also have a S.L.O.W. (speed limiting operator warning) function that limits the RPMs the engine is capable of attaining. This is important to keep an engine from running at overly-high revolutions during operation.
